

Marco von Orelli 6

The band „Marco von Orelli 6“ plays contemporary music in the vein of Jazz and Neue-Musik. This formation explores different ways of free improvised music. Vibrant and energetic; tender and fragile. The compositions and conceptual specifications originate from leader and trumpeter Marco von Orelli. These compositions and concepts serve as points of departure, as interstations and as transitional passages. They create unexpected incidents and turns in the music. A fascinating experience for the audience.

The current line up realizes von Orellis work in a devoted, most careful and responsible way. This group presents itself as a rich body of sound with plenty of free space, asking each member to contribute their gifts of improvising and their musical skills in a visionary way. Each concert has been a quest of discovering new, surprising moments in music, for both the audience and the musicians themselves.
